Food and Agricultural Import Regulations and Standards - Certification

FAIRS Export Certificate Report 2013

Approved By:

Thom Wright

Prepared By:

Titi Rahayu

Report Highlights:

This report lists the major export certificates and other requirements expected by the Government of Indonesia (GOI) from U.S. exporters of food and agricultural products.

Sections Updated: Section I; Section III; Section V; and Appendix I.

Section I. List of All Export Certificates Required By Government (Matrix) :

PRODUCTS	TITLE OF CERTIFICATES	ATTESTATION REQUIRED ON CERTIFICATE	PURPOSE	REQUESTING MINISTRY
Bovine genetics	Certificate of Health and Origin	Please refer to Section III	Animal health	Ministry of Agriculture
Live animals	Certificate of Health and Origin	Please refer to Section III	Animal health	Ministry of Agriculture
Animal by-products	Certificate of Health and Origin	Please refer to Section III	Animal health	Ministry of Agriculture
Petfood	Certificate of Processing Certificate of Origin Certificate of Analysis Veterinary Health Certificate.	Please refer to Section III	Animal health	Ministry of Agriculture
Poultry, meat and products derived from poultry and meat	Sanitary Health Certificate	Please refer to Section III	Food safety	Ministry of Agriculture
Milk, milk powder, milk products & cream, poultry egg	Sanitary Health Certificate Certificate of Free Sale	Please refer to Section III	Food safety	Ministry of Agriculture National Agency of Drug & Food Control (BPOM)
All food products	Health Certificate Certificate of Free Sale Certificate of Origin (for products from animal origin and its derivatives)	<ul style="list-style-type: none"> • Fit/safe for human consumption • Freely sold in the exporting country • Free from BSE/FMD 	Food safety	National Agency of Drug & Food Control (BPOM)
Plant Products	Phytosanitary Certificate	Please refer to Section III	Plant safety	Ministry of Agriculture
Fresh Meat, Dairy Products, Other Processed Food, and Food	Halal Certificate	Product Produced According to Halal Standards	Product Meets Religious Standards	Indonesia Council of Ulama (MUI)

Additives				
Fresh Products and Frozen Products of Fish and Seafood	Health Certificate	Uninfected by quarantine fish diseases and pests	Fish Quarantine	Ministry of Marine Affairs and Fisheries
Food Additives	Health Certificate Certificate of Free Radiation (for products from Japan) Certificate of Free Sale Certificate of Analysis Certificate of Origin (for products from animal origin, such as: beef powder, gelatin, collagen) Halal Certificate	<ul style="list-style-type: none"> • Fit/safe for human consumption • Freely sold in the exporting country • Free from BSE/FMD • Product Produced According to Halal Standards 	Food Safety Product Meets Religious Standards	National Agency of Drug & Food Control (BPOM)

Section II. Purpose of Specific Export Certificate(s)

Please refer to the Matrix under Section I.

Section III. Specific Attestations Required on Export Certificate(s)

Details of required export certificate attestation for the following products are available in GAIN Report [ID1046](#):

- Bovine genetics (frozen embryos; frozen semen);
- Live animals (horses; day old chick; breeding pigs; breeding cattle/buffalo/goat/sheep, and wild animal (bovidae family));
- Animal products (pet food; bone meal/meat meal/meat and bone meal/horn, hoof, blood meal, blood products of bovine, ovine, or caprine origin, poultry by product meal/feather meal of avian origin; poultry by product meal/feather meal of avian origin; wool, hair, bristles; duck down/duck feather/goose feather intended for industrial use; raw hide, skin of animal origin (bovine, ovine, caprine, swine, horse, rabbit, reptile, wild animal, fish); poultry hatching eggs; bovine bone derived gelatin, bovine hide derived gelatin);
- Meat and meat products (beef, beef offal and beef products; poultry meat; poultry products; milk, milk powder, milk products and cream).

In addition to **meat and meat products**, the GOI ([Minister of Trade regulation No. 24/2011](#)) also requires the full sixteen digit number from the Ministry of Trade's import license, as well as the issuance date of the import license to be written in the remarks section of FSIS' health certificate. Please refer to GAIN Report [ID1142](#) for more information on importing meat and meat products.

Please also see Appendix I for samples covering the requirements for the following products:

Sample Certificate of Poultry Meal and Feather Meal of Avian Origin

Sample Certificate of Origin for Dairy Products

Sample Certificate of Quality of Poultry by Product Meal

Sample Health Certificate of Pet Food

Sample Health Certificate of Egg Products

Sample AMS Sanitary Certificate for Dairy Products

Sample Phytosanitary Certificate for California Grapes

Sample Phytosanitary Certificate for Re-exported Products

Sample Halal Export Certificate

Sample Prior Notice

Sample Declaration of Conformity and Table of Product List

Sample State Seal

Sample Letter of Authorization

Sample Meat and Poultry Export Certificate of Wholesomeness

Fresh Fruit and Vegetables

- The Plant Quarantine Service from the country of origin and transit country must issue Phytosanitary Certificates.
- The Additional Declaration of the Phytosanitary Certificate for grapes must state that the imported fruit have been produced within a pest free area (To date only the state of California has been declared by the GOI to be an area free from *Ceratitis capitata*).
- Fresh fruit and vegetables other than California grapes shall be treated prior to shipment (such as: with fumigation, vapor heat treatment (VHT), and irradiation) or cold treatment with temperatures appropriate for fresh fruit and vegetables during-in transit, whenever the commodities are originating from the production area where the regulated quarantine fruit flies are known to have occurred. The approved treatment shall be explained in the Phytosanitary Certificate under the Treatment Information.
- Fruit and vegetables must be packed in carton boxes and transported as a containerized cargo.

The GOI issued the regulation on fresh food of plant origin (FFPO) imports ([The Minister of Agriculture regulation No. 88/2011](#)) which requires FFPO Safety Certificate and Prior Notice from the country of origin. An FFPO safety certificate is a written assurance given by competent authority on food safety of country of origin stating that the commodity is safe and fit for consumption. On January 3, 2013 the GOI has extended the recognition of U.S. food safety control system of FFPO through the Minister of Agriculture decree No. 3/2013 (GAIN Report [ID1302](#)). Therefore, the GOI does not require FFPO safety certificates other than phytosanitary certificate, for U.S. fruit, vegetables, soybean, wheat, and other plant origin products. The list of 100 U.S. commodities that has been recognized by the GOI can be seen at the appendix of [this decree](#).

Section IV. Government Certificate's Legal Entry Requirements

1. Health certificates of animal origin:
 - a. must accompany the commodities at the time of entry. If the commodities are transported by

- vessel, the certificate should be sent earlier to the quarantine officer at the port of entry;
- b. must be issued by a veterinarian authorized by the U.S. Department of Agriculture and endorsed by an APHIS/Veterinary Services (VS) veterinarian;
 - c. are valid no more than two months;
 - d. can be applied to only one shipment;
 - e. State-issued certificates will be accepted by the Indonesian government (GOI), however GOI requires that a standard certificate form be used, including institution logo/symbol, health certificate number, consistency on whether handwritten or typed, and consistent size and weight paper. If possible, GOI would like to have the certificate electronically to make it easier for checking certificate validity and releasing the commodity faster; and
 - f. export declarations by suppliers or manufacturers as proof of compliance are acceptable.
2. Phytosanitary certificates should be in accordance with recommendations of the International Plant Protection Convention (IPPC). Additionally, fumigation certificates are required for products that are considered as a vector of disease, such as soybeans and corn.
 3. Certificate of “Free sale” and certificate of health stating that the product is “Fit for Human Consumption” that accompany processed food products must be issued and endorsed by the health department of the country of origin. Letters issued by Chambers of Commerce or notary public will not be accepted. However, based on an agreement between FAS Jakarta and the National Agency of Drug and Food Control (BPOM), BPOM accepts a “Declaration of Conformity” from U.S. distributors as satisfying the requirement for Health Certificate or Certificate of Free Sale. To ensure the authenticity of the document, the Declaration of Conformity shall be notarized, and State Seal shall be used to verify the legal standing of the notary. It also shall state that all products are fit for human consumption, and are manufactured and available in the United States. Samples of Declaration of Conformity and State Seal are in Attachment I. A validity period of “Declaration of Conformity” is in accordance with as specified in the State Seal of approval. If the State Seal doesn’t mention an appointment period of the notary, then a validity period is one year from the date of issuance.
 4. Pet Food products must be accompanied by a document that says the products certified herein are officially authorized for sale and use as pet foods in the United States.
 5. Meat and Meat products
 - a. The imported meat should be shipped directly from the country of origin to the port of entry in Indonesia unless prior approval is obtained from the Ministry of Agriculture.
 - b. The packing of meat shall be originally sealed with all marks including the veterinary control number, date of slaughter, and type of meat still readable.
 - c. The container for transporting meat from the country of origin shall be sealed by the authorized veterinarian and can only be opened by the Authorized Animal Quarantine Officer in the port of entry.
 - d. During transportation, the temperature in the container shall be kept stable (between -18° to -22° C).
 6. Fresh Fruit and Vegetables
Phytosanitary Certificates must be issued by the Plant Quarantine Service from the country of origin

and in-transit country.

7. The GOI would accept phytosanitary certificates for processed plant products. However, if the authority institution in the exporter country was not possible to issue the certificate, the GOI would accept the export certificate for processed plant products with explanation on the treatment of the products in the certificate.

Section V. Other Certification/Accreditation Requirements

1. Any entry of animals, materials of animal origin, or products made of materials of animal origin are subject to the following conditions:
 - a. Importers must obtain an import permit from the Ministry of Trade.
 - b. The permit for import of live animal, animal products, and processed animal products that possess risk of zoonosis spread will be released after obtaining Import Approval Recommendation (RPP) from the Ministry of Agriculture. The Minister of Agriculture delegates authority on the issuance of RPP to the Directorate General of Livestock and Animal Health Services. The issuance of RPP for live cattle, beef, and edible offal is conducted in 2 periods during the course of a year.
 - c. The permit for import of processed animal products will be released after obtaining recommendation from Head of the National Agency of Drug and Food Control.
 - d. Must be accompanied by a Certificate of Origin stating that the animals, materials of animal origin or their products came from an area known to be free from quarantine disease in Category I and acknowledged by a GOI authorized official if originating from abroad.
 - e. Importation must be made through designated points of entry.
2. Certificate of Origin Country can be issued by Chambers of Commerce or notary public.
3. Materials of animal origin or products made of materials of animal origin, which include dairy products, intended for human consumption must also be accompanied by a Halal certificate from an accredited Islamic Council (except pork).
4. Prior to importing, seed importers must request an import permit from the Ministry of Agriculture (DG of Ornaments Plant, DG of Food Crops, or DG of Estate Crops) through the National Seed Agency. The permit is valid for 6 months.
5. Letter of Appointment from the producer of processed food products is required. However, according to an agreement with FAS, BPOM accepts “Letter of Appointment” directly from the distributors. These documents shall be properly notarized and accompanied by a document which verifies that the company is a legal entity in the United States (e.g. a certificate origin from the Chamber of Commerce). A sample of Letter of Appointment can be found in Attachment I.
6. Other certificates needed for certain food products, to include raw materials and food additives, are as follows:
 - a. Composition analysis certificate from producers (per batch) or from accredited laboratories. The certificate must be original and valid for maximum 12 months.
 - b. Genetically Modified Organism (GMO) content certificate stating “Product MAY contain

ingredients sourced from GM materials” for products (including food additives) derived from soybeans, corn, tomatoes, and potatoes.

- c. Aflatoxin analysis result for nuts and peanut products
 - d. Halal certificate from the Indonesian Council of Ulama for products that indicate Halal logo in the label.
 - e. Indonesian National Standard (SNI) certificate and Potassium Bromate (KBrO₃) Free Certificate for wheat flour.
 - f. Radiation free certificate for products originating from Japan and dairy products originating from Europe.
 - g. Results of residue analysis 3-Monochloro Propandiol (3-MCPD) from accredited government laboratories for isolated soy protein, soy sauce, and hydrolyzed vegetable protein.
 - h. Original document listing production date and expiration date, as well as batch number/lot number//production code.
 - i. Products with short shelf life, such as: milk and milk products, and other high risk foods, should have at least 2/3 of shelf life remaining at time of export.
 - j. The SNI certificate for bottled water, cocoa powder, refined sugar, and salt.
 - k. Melamine analysis result for raw material that is suspected contains melamine, such as: milk, flour, protein vegetable, egg and its processed, and for food additives (ammonium bicarbonate).
 - l. Chloramphenicol analysis result for honey products.
 - m. Formalin analysis result for products that is suspected contains formalin.
 - n. Analysis certificate of Sudan Red for Oleoresin Capsicum products.
7. Prior Notice is a statement letter in the form regarding identity of FFPO that must be completed by the producer or exporter in the country of origin. The Indonesian plant quarantine officers should receive a Prior Notice, which can be submitted [online](#), no later upon arrival of FFPO. The sample of Prior Notice can be seen at Appendix I. Additional information regarding Prior Notice can be found at GAIN Report [ID1206](#).
 8. Imports of certain fresh horticultural products (as listed in [Attachment II of Ministry of Agriculture Regulation No. 86/2013](#)) require a Good Agricultural Practices (GAP) certificate/ farm registration and packing house registration. The required documents for obtaining a RIPH for fresh horticultural products, as stated in the technical requirements, include good agricultural practices (GAP) certificate or farm registration, and packing house registration. All documents must be translated to Indonesian language.
 9. According to Ministry of Trade (MOT) Regulation No. 60/2012, the MOT requires horticulture products entering Indonesia to be verified by Indonesian surveyors and/or their authorized agents in the country of origin. This verification is not a food safety and/or quarantine inspection, but rather a way for the MOT to oversee the completeness and correctness of import documents, product accountability, and the physical condition of the products. Finally, the products must have Bahasa Indonesia labels attached to the packaging, and the labels must be attached prior to entering the Indonesian customs zone.

Appendix I. Electronic Copy or Outline of Each Export Certificate
Sample Health Certificate for Poultry By-product and Feather Meal of Avian Origin

**Certification for "Poultry Byproduct/Feather Meal of Avian Origin"
exported from the US to Indonesia**

Country of export: United States of America

Authority responsible for certificate: USDA, Animal and Plant health
Inspection Service

Description of product: _____

Identification: _____

Means of transport: _____

Name and address of exporter: _____

Name and address of importer: _____

CERTIFICATIONS:

1. The products come from an area which meets the World Organization for Animal Health's (OIE) criteria to be considered free of highly pathogenic avian influenza (HPAI) and where no outbreak of foot-and-mouth disease (FMD) has been reported within 1 (one) month prior to export.
2. The products come from the following rendering plant(s) officially approved by APHIS to export to Indonesia [APHIS approval numbers to be listed]. The rendered meals meet the requirements of the United States for domestic sale and use.
Approval Nos.: _____
3. The products come from rendering plants that either:
 - 1) render only one species or
 - 2) have dedicated lines or a separation/flushing protocol to ensure that poultry-origin meals manufactured for export to Indonesia are not contaminated with ruminant or porcine materials.

4. The rendering plant(s) maintains records on all raw material sources.
The product certified herein was produced on the following dates:

5. The products have been subjected to routine testing for Salmonella:
 - a. In accordance with the American Protein Producers Industry (APPI) protocol in an APPI approved laboratory that is accredited or meets USDA APHIS standards; or
 - b. In a laboratory acceptable to the USDA, APHIS. [If b is checked, latest lab results are included]
6. The rendered material was subjected to dry heat at a minimum temperature of 118⁰C (245⁰F) for a minimum of 40 minutes or a continuous hydrolyzing process at a minimum temperature of 122⁰C (250⁰F) for a minimum of 15 minutes with a minimum pressure of 55 lbs/square inch.
7. Precautions have been taken to prevent contamination of the product with pathogenic agents following processing.
8. The products were processed under sanitary conditions and in accordance with good manufacturing practices.
9. The products do not contain ruminant or porcine ingredients.

DISCLAIMER

This report was prepared by the USDA/Foreign Agricultural Service in Jakarta, Indonesia for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate because policies have changed since its preparation, or clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their Indonesian customers (importer), who are normally best equipped to research such matters with local authorities, before any goods are shipped. Final import approval of any product is subject to the importing country's rules and regulations as interpreted by border officials at the time of product entry.
